## **2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

### **2.1 Basis of preparation of separate financial statements**

The separate financial statements have been prepared in accordance with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System and applicable regulations on preparation and presentation of the separate financial statements. The separate financial statements have been prepared under the historical cost convention.

The accompanying separate financial statements are not intended to present the separate financial position and separate results of its operations and its separate cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam. The accounting principles and practices utilised in Vietnam may differ from those generally accepted in countries and jurisdictions other than Vietnam.

Separately, the Company has also prepared consolidated financial statements of the Company and its subsidiaries (together, "the Group") in accordance with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System and applicable regulations on preparation and presentation of consolidated financial statements. In the consolidated financial statements, subsidiary undertakings, which are those companies over which the Group has the power to govern the financial and operating policies, have been fully consolidated.

Users of these separate financial statements of the Company should read them together with the consolidated financial statements of the Group for the six-month period ended 31 December 2024 in order to obtain full information of the consolidated financial position and consolidated results of its operations and its consolidated cash flows of the Group.

The separate financial statements in the Vietnamese language are the official statutory separate financial statements of the Company. The separate financial statements in the English language have been translated from the Vietnamese version.

### **2.2 Fiscal year**

The Company's fiscal year is from 1 January to 31 December.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.3 Currency**

The separate financial statements are measured and presented in Vietnamese Dong (“VND” or “Dong”), which is the Company’s accounting currency.

**2.4 Exchange rates**

Transactions arising in foreign currencies are translated at exchange rates prevailing at the transaction dates. Foreign exchange differences arising from these transactions are recognised in the separate income statement.

Monetary assets and liabilities denominated in foreign currencies at the separate balance sheet date are respectively translated at the buying and selling exchange rates at the separate balance sheet date of the commercial bank with which the Company regularly transacts. Foreign currencies deposited in banks at the separate balance sheet date are translated at the buying exchange rate of the commercial bank where the Company opens its foreign currency accounts. Foreign exchange differences arising from these translations are recognised in the separate income statement.

**2.5 Cash and cash equivalents**

Cash and cash equivalents include cash on hand, cash at banks, and other short-term investments with an original maturity of three months or less.

**2.6 Receivables**

Receivables represent trade receivables from customers arising from sales of goods and rendering of services or non-trade receivables from others and are stated at cost. Provision for doubtful debts is made for each outstanding amount based on overdue days in payment according to the initial payment commitment (exclusive of the payment rescheduling between parties) or based on the estimated loss that may arise. The difference between the provision of this period and the provision of the previous period is recognised as an increase or decrease of general and administration expenses in the period. Bad debts are written off when identified as uncollectible.

Receivables are classified into short-term and long-term receivables on the separate balance sheet based on the remaining period from the separate balance sheet date to the maturity date.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.7 Inventories**

Inventories are stated at the lower of cost and net realisable value. Cost is determined by the weighted average method and includes all costs of purchase, costs of conversion and other directly-related costs incurred in bringing the inventories to their present location and condition. In the case of manufactured products, cost includes all direct expenditure and production overheads based on normal levels of operating activity. Net realisable value is the estimated selling price in the normal course of business, less the estimated costs of completion and selling expenses.

Construction materials and construction work are stated at the lower of cost and net realizable value. Cost is determined by the weighted average method and includes all costs of purchasing and other costs of acquiring construction materials and of constructing the work in its present location and condition. Net realizable value is the estimated selling price of building materials and construction works in the ordinary course of business, less the estimated costs of completion and transfer expenses.

The Company applies the perpetual system for inventories.

Provision is made, where necessary, for obsolete, slow-moving, and defective inventory items. The difference between the provision of this period and the provision of the previous period is recognised as an increase or decrease of cost of goods sold in the period.

**2.8 Investments**

**(a) Investments held to maturity**

Investments held to maturity are investments which the Company has a positive intention and ability to hold until maturity.

Investments held to maturity include term deposits and bonds held to maturity. Those investments are initially accounted for at cost. Subsequently, the Board of Management reviews all outstanding investments to determine the amount of provision to recognise at the period end.

Provision for diminution in value of investments held to maturity is made when there is evidence that the investment is uncollectible in whole or in part. Changes in the provision balance during the accounting period are recorded as an increase or decrease in financial expenses. A reversal, if any, is made only to the extent the investment is restored to its original cost.

Investments held to maturity are classified into short-term and long-term investments held to maturity on the separate balance sheet based on the remaining period from the separate balance sheet date to the maturity date.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.8 Investments (continued)**

**(b) Investments in subsidiaries**

Subsidiaries are all entities whose financial and operating policies the Company has the power to govern the financial and operating policies in order to gain future benefits from their activities, generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity.

Investments in subsidiaries are initially recorded at cost of acquisition plus other expenditure directly attributable to the investment. Subsequently, the Board of Management reviews all outstanding investments to determine the amount of provision to recognise at the period end.

**(c) Investments in associates**

Associates are investments that the Company has significant influence but not control over and the Company would generally have from 20% to less than 50% of the voting rights of the investee.

Investments in associates are accounted for at cost of acquisition including purchase cost or capital contribution value plus other expenditure directly attributable to the investments. Subsequently, the Board of Management reviews all outstanding investments to determine the amount of provision to recognise at the period end.

**(d) Investments in other entities**

Investments in other entities are investments in equity instruments of other entities without controlling rights or co-controlling rights, or without significant influence over the investee. These investments are accounted for initially at cost. Subsequently, the Board of Management reviews all outstanding investments to determine the amount of provision to recognise at the period end.

**(e) Provision for investments in subsidiaries, associates and other entities**

Provision for investments in subsidiaries, associates, and other entities is made when there is a diminution in value of the investments at the period end.

Provision for investments in subsidiaries and associates is calculated based on the loss of investees.

Provision for investments in other entities is calculated based on market value if market value can be determined reliably. If market value can not be determined reliably, the provision is calculated similarly to provision for investments in subsidiaries and associates.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.8 Investments (continued)**

**(e) Provision for investments in subsidiaries, associates and other entities (continued)**

Changes in the provision balance during the accounting period are recorded as an increase or decrease in financial expenses. A reversal, if any, is made only to the extent the investment is restored to its original cost.

**2.9 Lendings**

Lendings are lendings granted for the earning interest under agreements among parties but not for being traded as securities.

Lendings are initially recognised at cost. Subsequently, the Board of Management reviews all outstanding amounts to determine the amount of provision to recognise at the period end. Provision for doubtful lending is made for each lending based on overdue days in payment of principals according to the initial payment commitment (exclusive of the payment rescheduling between parties) or based on the expected loss that may arise. Changes in the provision balance during the accounting period are recorded as an increase or decrease in financial expenses. A reversal, if any, is made only to the extent the investment is restored to its original cost.

Lendings are classified into short-term and long-term lendings on the separate balance sheet based on the remaining term of the lendings as at the separate balance sheet date.

**2.10 Construction contracts**

A construction contract is a contract specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of design, technology and functions or ultimate purpose of use.

When the outcome of a construction contract can be estimated reliably, and the contractor is paid, contract revenue and contract costs are recognised over the period of the contract as revenue and expenses, respectively for the works performed and certified by customer. The compensation and other revenue are only recognised in revenue when certified by customer.

When the outcome of a construction contract cannot be reliably estimated, contract revenue is recognised to the extent of contract costs incurred where it is probable those costs will be recoverable. Contract costs are only recognised when incurred during the period.

**2.11 Business cooperation contract**

A business cooperation contract ("BCC") is a contract between the Company and other parties to carry out specific business activities without establishing a new legal entity. These activities are controlled by one of the parties. The BCC is based on shares of post-tax profits. The parties in a BCC may agree to share profits after tax.

## CONSTRUCTION CORPORATION NO 1 JOINT STOCK COMPANY

### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 2.11 Business cooperation contract (continued)

A BCC in the form of shares of profits after tax is jointly controlled or controlled by one party.

- If a BCC states that each party is entitled to a fixed amount of profit regardless of the performance of the BCC, it is a lease of asset in substance.
- If the BCC states that each party is entitled to profits when the BCC is profitable and is required to bear losses when the BCC is loss making, in substance, the BCC parties share revenue and expenses because each party can jointly control the operation and cash flows of the BCC.

When the Company is not in charge of accounting and tax finalisation, the Company accounts for its proportionate share of revenue and expenses from the BCC.

#### 2.12 Fixed assets

##### *Tangible and intangible fixed assets*

Fixed assets are stated at historical cost less accumulated depreciation or amortisation. Historical cost includes expenditure that is directly attributable to the acquisition of the fixed assets bringing them to suitable conditions for their intended use. Expenditure which is incurred subsequently and has resulted in an increase in the future economic benefits expected to be obtained from the use of fixed assets, can be capitalised as an additional historical cost. Otherwise, such expenditure is charged to the separate income statement when incurred in the period.

##### *Depreciation and amortisation*

Fixed assets are depreciated and amortised using the straight-line basis so as to write off the depreciable amount of the fixed assets over their estimated useful lives. Depreciable amount equals to the historical cost of fixed assets recorded in the separate financial statements minus (-) the estimated disposal value of such assets. The estimated useful lives of each asset class are as follows:

Buildings and structures	3 – 25 years
Machinery and equipment	3 – 7 years
Motor vehicles	6 – 8 years
Office equipment	3 – 5 years
Software	3 years
Others	5 years

Land use rights comprise of land use rights and prepaid land use rights obtained under land rental contracts which are effective before the effective date of land law 2003 (ie. 1 July 2004) and which land use right certificates are granted.

Indefinite land use rights are stated at costs and not amortised.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.12 Fixed assets**

*Disposal*

Gains or losses on disposals are determined by comparing net disposal proceeds with the carrying amount of the fixed assets and are recognised as income or expense in the separate income statement.

*Construction in progress*

Construction in progress represents the cost of assets in the course of installation or construction for production, rental or administrative purposes, or for purposes not yet determined, which are recorded at cost and are comprised of such necessary costs to construct, repair and maintain, upgrade, renew or equip the projects with technologies as construction costs; costs of tools and equipment; project management expenditure; construction consulting expenditure; and capitalised borrowing costs for qualifying assets in accordance with the Company's accounting policies. Depreciation of these assets, on the same basis as other fixed assets, commences when the assets are ready for their intended use.

**2.13 Investment properties held for lease**

The historical cost of an investment property held for lease represents the amount of cash or cash equivalents paid or the fair value of another consideration given to acquire the investment property held for lease at the time of its acquisition or completion of construction. Expenditure incurred subsequently which has resulted in an increase in the expected future economic benefits from the use of investment properties held for lease can be capitalised as an additional historical cost. Otherwise, such expenditure is charged to the separate income statement when incurred in the period.

*Depreciation*

Investment properties held for lease are depreciated on straight-line basis to write off the depreciable amount of the assets over their estimated useful lives. The estimated useful lives of each asset class are as follows:

Land use rights	50 years
Buildings and structures	25 years

**2.14 Prepaid expenses**

Prepaid expenses include short-term and long-term prepayments on the separate balance sheet. Prepaid expenses are recorded at historical cost and allocated on a straight-line basis over estimated useful lives.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.15 Payables**

Classifications of payables are based on their nature as follows:

- Trade accounts payable are trade payables arising from purchase of goods and services; and
- Other payables are non-trade payables, and payables not relating to purchases of goods and services.

Payables are classified into short-term and long-term payables on the separate balance sheet based on the remaining period from the separate balance sheet date to the maturity date.

**2.16 Borrowings and finance lease liabilities**

Borrowings and finance lease liabilities include borrowings and finance lease liabilities from banks, and other entities.

Borrowings and finance lease liabilities are classified into short-term and long-term on the separate balance sheet based on their remaining period term from the separate balance sheet date to the maturity date.

Borrowing costs that are directly attributable to the construction or production of any qualifying assets are capitalised during the period of time that is required to complete and prepare the asset for its intended use. In respect of general-purpose borrowings, a portion of which used for the purpose of construction or production of any qualifying assets, the Company determines the amount of borrowing costs eligible for capitalisation by applying a capitalisation rate to the weighted average expenditure on the assets. The capitalisation rate is the weighted average of the interest rates applicable to the Company's borrowings that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. Other borrowing costs are recognised in the separate income statement when incurred.

**2.17 Accrued expenses**

Accrued expenses include liabilities for goods and services received in the period but not yet paid for, due to pending invoices or insufficient records and documents. Accrued expenses are recorded as expenses in the accounting period.

**2.18 Provisions**

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated. Provision is not recognised for future operating losses.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.18 Provisions (continued))**

Provisions are measured at the level of the expenditures expected to be required to settle the obligation. If the time value of money is material, provision will be measured at the present value using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as a financial expense. Changes in the provision balance during the accounting period are recorded as an increase or decrease in operating expenses.

**2.19 Unearned revenue**

Unearned revenue mainly comprises the amounts that customers have paid in advance for one or many accounting periods for asset leases. The Company records unearned revenue for the future obligations that the Company has to fulfil. Unearned revenue is recognised as revenue in the separate income statement during the period to the extent that revenue recognition criteria have been met.

Unearned revenue is classified into short-term and long-term on the separate balance sheet based on the obligations that the Company will perform within next 12 months or normal business cycle and after next 12 months or after normal business cycle as at separate balance sheet date.

**2.20 Capital and reserves**

Owners' capital is recorded according to the actual amounts contributed at par value of the shares.

Share premium is the difference between the par value and the issue price of shares and the difference between the repurchase price and re-issuing price of treasury shares.

Treasury shares bought before the effective date of the Securities Law (ie. 1 January 2021) are shares issued by the Company and bought back by itself, but these are not cancelled and may be re-issued subsequently in accordance with the Law on Securities. Treasury shares brought after 1 January 2021 will be cancelled and adjusted to reduce equity.

Undistributed earnings record the Company's accumulated results profit after CIT at the reporting date.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.21 Appropriation of profit**

The Company's dividends are recognised as a liability in the Company's separate financial statements in the period in which the dividends are approved by the Company's General Meeting of Shareholders and the list of shareholders entitled to receive dividends according to the Resolution of the Board of Directors of the Company.

The plan for distribution of profit after CIT is implemented in accordance with the Resolution of the General Meeting of Shareholders and after appropriation to other funds in accordance with the Company's charter and Vietnamese regulations.

The Company's funds are as below:

**(a) Investment and development fund**

Investment and development fund is appropriated from profit after CIT of the Company and approved by shareholders at the General Meeting of Shareholders. This fund is used for the Company's expansion of its operation or in-depth investments.

**(b) Bonus and welfare fund**

Bonus and welfare fund is appropriated from profit after CIT of the Company and approved by shareholders at the General Meeting of Shareholders. This fund is presented as a liability on the separate balance sheet. The fund is used to reward and encourage material benefits, to serve the needs of public welfare, to improve and enhance the material and spiritual life of employees.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.22 Revenue recognition**

**(a) Revenue from sales of goods**

Revenue from sale of goods is recognised in the separate income statement when all five (5) of the following conditions are satisfied:

- The Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company; and
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

No revenue is recognised if there are significant uncertainties regarding recovery of the consideration due or the possible return of goods.

Revenue is recognised in accordance with the "substance over form" principle and allocated to each sale obligation. If the Company gives promotional goods to customers associated with their purchases, the Company allocates the total considerations received between goods sold and promotional goods. The cost of promotional goods is recognised as cost of goods sold in the separate income statement.

**1. Revenue from construction contracts**

Revenue from construction contracts is comprised of the revenue initially set out in contracts; increases, decreases during the term of the contract; bonuses; and other payments to be received from customers or other parties to compensate for the costs not included in the contractual price; other payments that customers agreed to compensate; and other payments provided that these amounts can change the revenue and can be reliably determined. Revenue from construction contracts is recognised in accordance with the guidance presented in Note 2.10.

**(c) Revenue from rendering of services**

Revenue from rendering of services is recognised in the separate income statement when the services are rendered, by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided. Revenue from rendering of services is only recognised when all four (4) of the following conditions are satisfied:

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The percentage of completion of the transaction at the separate balance sheet date can be measured reliably; and
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.22 Revenue recognition (continued)**

**(d) Interest income**

Interest income is recognised on the basis of the actual time and interest rates for each period when both (2) of the following conditions are satisfied:

- It is probable that the economic benefits associated with the transaction will flow to the Company; and
- Income can be measured reliably.

**(e) Dividend income**

Income from dividends is recognised when the Company has established the receiving rights from investees.

**2.23 Sales deductions**

Sales deductions include trade discounts, sales returns and allowances. Sales deductions incurred in the same period of the related revenue from sales of products, goods and rendering of services are recorded as a deduction from the revenue of that period.

Sales deductions for sales of products, goods or rendering of services which are sold/rendered in the period but are incurred after the separate balance sheet date but before the issuance of the separate financial statements are recorded as a deduction from the revenue of the period.

**2.24 Cost of goods sold and services rendered**

Cost of goods sold and services rendered are the cost of finished goods, merchandise, materials sold or services rendered during the period, and recorded on the basis of matching with revenue and on a prudent basis.

**2.25 Financial expenses**

Financial expenses are expenses incurred in the period for financial activities including expenses or losses relating to financial investment activity, expenses of borrowing; provision for diminution in value of investments, losses incurred when selling foreign currencies, losses from foreign exchange differences, and payment discounts.

**2.26 Selling expenses**

Selling expenses represent expenses that are incurred in the process of selling products, goods, and providing services.

**2.27 General and administration expenses**

General and administration expenses represent expenses that are incurred for administrative purposes of the Company.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**2.28 Current and deferred income tax**

Income tax includes all income tax which is based on taxable profits. Income tax expense comprises current income tax expense and deferred income tax expense.

Current income tax is the amount of income tax payable or recoverable in respect of the current period taxable profits at the current period tax rates. Current and deferred income tax are recognised as an income or an expense and included in the profit or loss of the period, except to the extent that the income tax arises from a transaction or event which is recognised, in the same or a different period, directly in equity.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the separate financial statements. Deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of occurrence affects neither the accounting nor the taxable profit or loss. Deferred income tax is determined at the tax rates that are expected to apply to the accounting period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted by the separate balance sheet date.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

**2.29 Related parties**

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with the Company, including holding companies, subsidiaries and fellow subsidiaries are related parties of the Company. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Company that gives them significant influence over the Company, key management personnel, including members of the Board of Directors, the Audit Committee, the Board of Management of the Company and close members of the family of these individuals and companies associated with these individuals also constitute related parties.

In considering its relationship with each related party, the Company considers the substance of the relationship not merely the legal form.

**2.30 Critical accounting estimates**

The preparation of separate financial statements in conformity with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System and applicable regulations on preparation and presentation of separate financial statements requires the Board of Management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of these separate financial statements and the reported amounts of revenues and expenses during the accounting period.

Such estimates and assumptions are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are assessed by the Board of Management to be reasonable under the circumstances.

## CONSTRUCTION CORPORATION NO 1 JOINT STOCK COMPANY

- (i) These are short-term loans at commercial banks, with terms from 6 months to 11 months, bearing interest at the rates from 5%/year to 10,25%/year. The loans are used to supplement for working capital. The loans are secured by motor vehicles (Note 10), future claims arising from the Company's projects.
- (ii) These are unsecured loans from related individuals, bearing interest at the rate of 0%/year to supplement working capital.
- (iii) This is a loan with a term of 84 months, bearing interest at the rate of 10.3%/year for the first 5 months. The interest rate is adjusted periodically every 3 months from the 6th month onwards with the interest rate equal to the base interest rate of Viet Capital Commercial Joint Stock Bank at the time of adjustment plus an interest rate range of 4%/year. This loan is used to finance the purchase of fixed assets – motor vehicles, the underlying assets is used to secure the loan.
- (iv) This is a loan with a term of 48 months and the lending interest rate is determined for each loan receipt according to the decision of Nam A Bank at the time of disbursement. Loan interest rates will be adjusted or not adjusted by Nam A Bank from time to time and in accordance with the State Bank's regulations on lending interest rates.
- (v) This is a loan authorized by the Ministry of Finance to Vietnam Development Bank to lend to the Company under the Loan Agreements No. 3240 – VIE and 3242 – VIE (SF) for the purpose of financing projects and construction works of the Company and other units. The loan has a term of 25 years and bears interest at the rate of 6 months LIBOR in USD plus an interest margin of 0.6%/year, minus a deduction of 0.1%/year and an insurance premium of 0.2%/year. From the debt repayment period of 1 December 2022, the Vietnam Development Bank applied the SOFR interest rate to replace the LIBOR interest rate based on Official Dispatch No. 326/NHPT-VNN dated 18 March 2022, according to the Bank's Notice Vietnam Development Bank and Ministry of Finance. The loan is secured by term deposit contracts of the Company, machinery and equipment of No. 1 Viet Hung Construction Joint Stock Company, land use rights and assets attached to land of Chuong Duong Joint Stock Company, and the right to collect the payback fee of the Dong Nai bridge BOT project
- (vi) This is a finance lease liability with a term of 60 months, bearing interest at the rate of 10.5%/year for the first 3 months. The interest rate of this finance lease liability is adjusted periodically every 3 months from the 4th month onwards with an interest rate equal to the ceiling deposit rate of VND 12-month term for individual customers of Vietnam Joint Stock Commercial Bank for Industry and Trade at the time of adjustment plus an interest margin of 3%/year.

This is a finance lease liability with a term of 60 months, bearing interest at the rate of 9.5%/year for the first 3 months. The interest rate of this finance lease liability is adjusted periodically every 3 months from the 4th month onwards with an interest rate equal to the term deposit interest rate of VND 12-month term for individual customers of Joint Stock Commercial Bank for Investment and Development of Vietnam at the time of adjustment plus an interest margin of 3%/year.
